NORCO

EGYPT · GENERAL TRADING

Exclusive Vestwoods (Haier Energy) agency

Lithium battery energy storage

Egypt · Sudan · Algeria · Libya

Energy storage Egypt can't do without.

Invest in NORCO Egypt, the exclusive distributor of Vestwoods lithium battery storage across four North & East African markets — targeting **$48.3M revenue** and **$9.4M net profit** over five years, with every dollar of profit distributed and Year-1 profit alone nearly repaying the raise.

INVESTMENT SOUGHT

THE OPPORTUNITY

Why Vestwoods, why now

Egypt's grid has run structural summer deficits since 2023. Storage is no longer a luxury — it's a purchase of necessity, and NORCO holds the exclusive agency for a Haier-backed brand priced to win.

Purchase of necessity

Load-shedding, diesel escalation and net-metering under Law 87/2015 drive villas, clinics, telecom towers and light industry to lithium storage across all four markets.

Priced to win in batteries

Vestwoods retails 15–26% below tier-1 brands per kWh with Haier pedigree, a 5-year warranty and a Cairo service bench the grey market cannot match.

Exclusive agency + credit

Price control across Egypt, plus Sinosure-backed supplier credit (10% down + 90% at 3-month credit) that keeps the working-capital need to ~$0.9M.

THE MARKETS

Four corridors, one agency

Egypt

Core market. Retail + wholesale through two showrooms and a dealer network. 50/50 retail-wholesale mix at $433,281/container.

6 → 15

CONTAINERS Y1 → Y5

Sudan

Committed buyer; orders on arrival of first containers. 50% advance + 50% on delivery — working-capital positive.

4 → 10

CONTAINERS Y1 → Y5

Algeria

Agency in advanced negotiation; first orders Month 8 on 100% LC before shipment, FOB Jebel Ali. Zero in-country exposure.

3 → 8

CONTAINERS Y1 → Y5

Libya

Dual-hub distributors (Tripoli + Benghazi) from Year 2 on advance / confirmed LC. Chronic-outage residential & telecom demand.

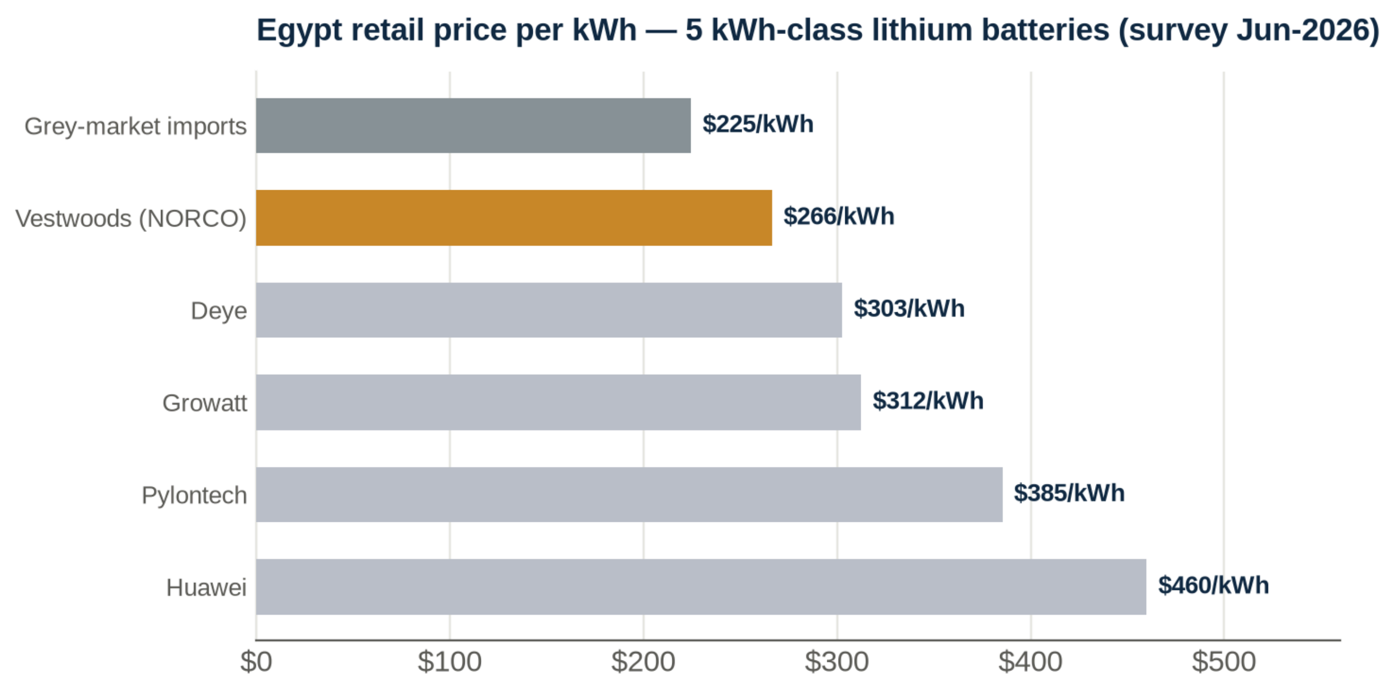
0 → 8

CONTAINERS Y2 → Y5

MARKET STUDY

Priced under every warrantied rival

NORCO's June-2026 Cairo market survey: Vestwoods undercuts every warrantied competitor per kWh, and only the no-warranty grey market is cheaper.

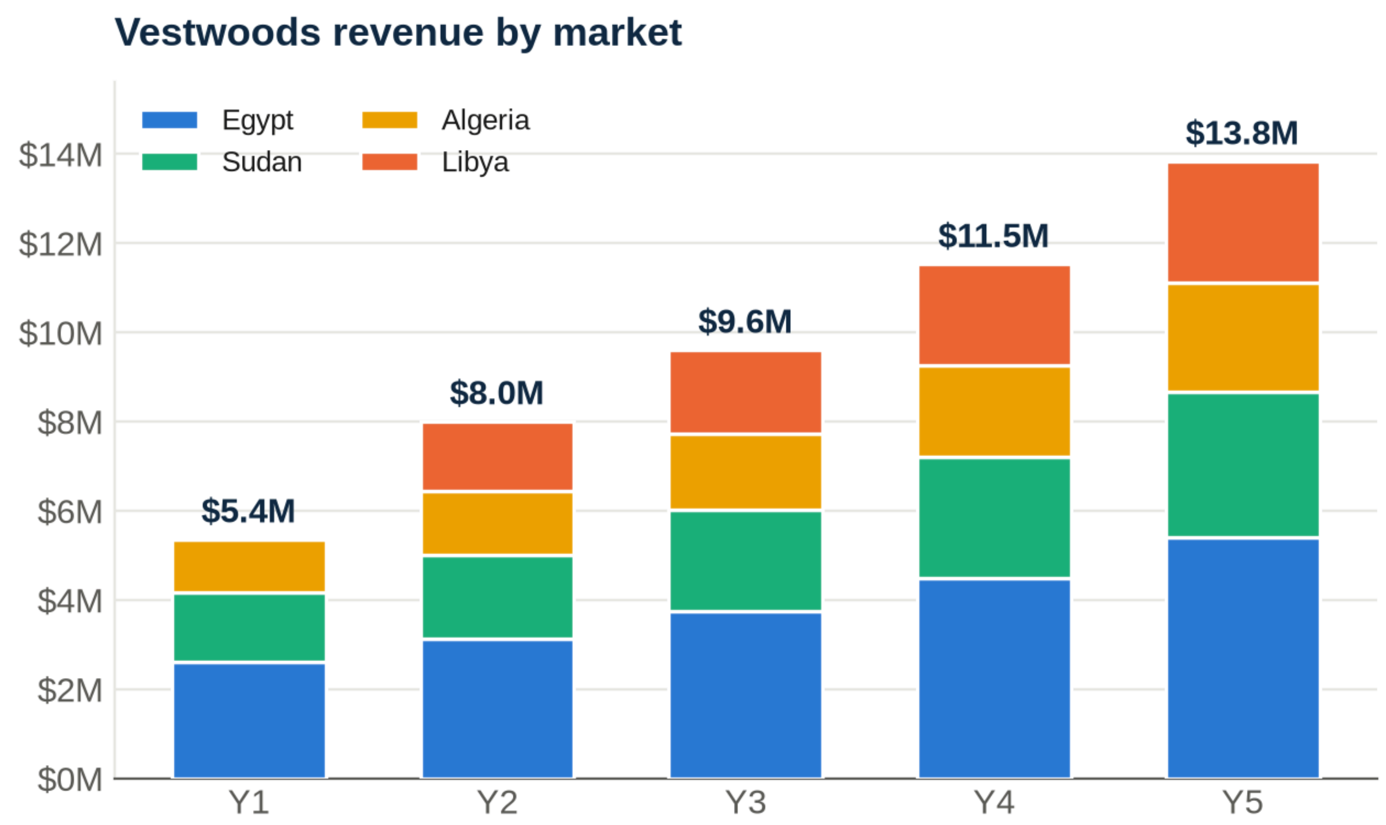


Vestwoods at $266/kWh vs. $303–$460 for warrantied competitors (Deye, Growatt, Pylontech, Huawei). The exclusive agency lets NORCO hold price while winning the warranty-sensitive installer, telecom and C&I buyer.

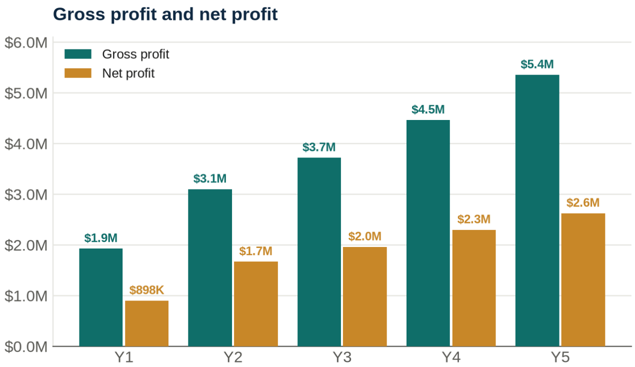
THE NUMBERS

Financial trajectory

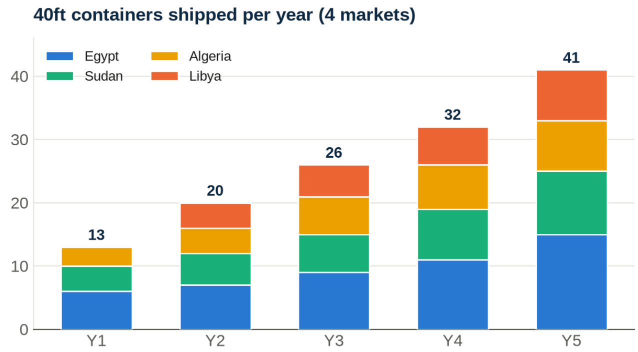
Every figure ties to the companion workbook. Egypt product cost 79% of revenue; export sales at wholesale per the founder's supply pricing. Year 1 is modelled monthly.



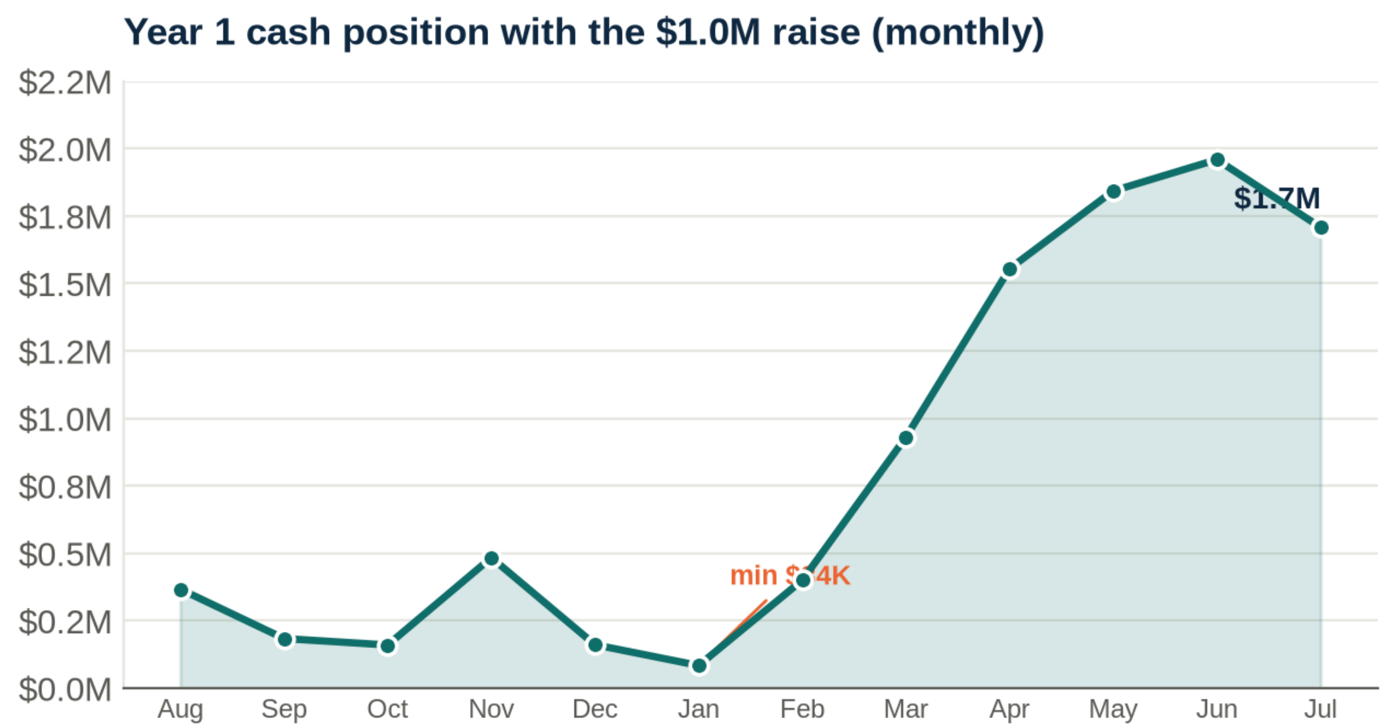
Revenue scales from $5.4M to $13.8M across four markets.



Profitable from Year 1; net profit reaches $2.62M by Year 5.



13 → 41 containers/yr across the four corridors.

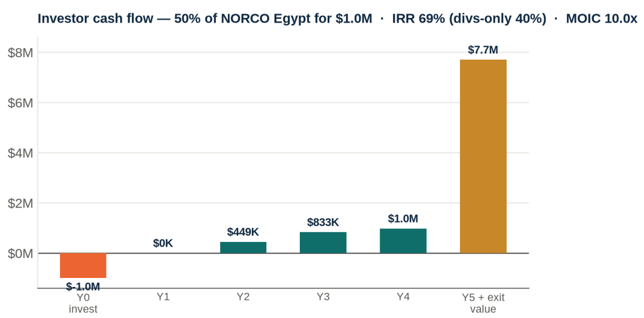


Year-1 cash never drops below $84K with the raise; ends at $1.71M.

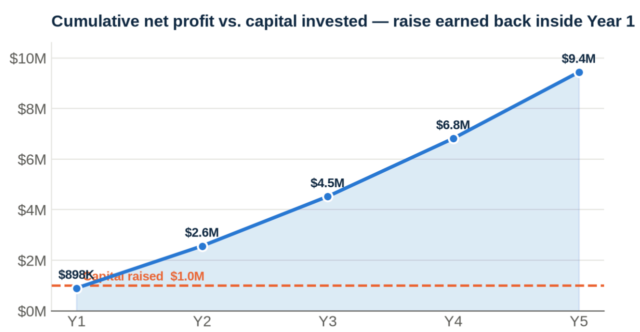
THE RETURN

What the investor earns

$1.0M buys 50% of NORCO Egypt. 100% of net profit is distributed annually in arrears — $3.4M to the investor in dividends alone (3.4x, 40% IRR) — and NORCO UAE (20% shareholder) anchors the exclusive Vestwoods agency.

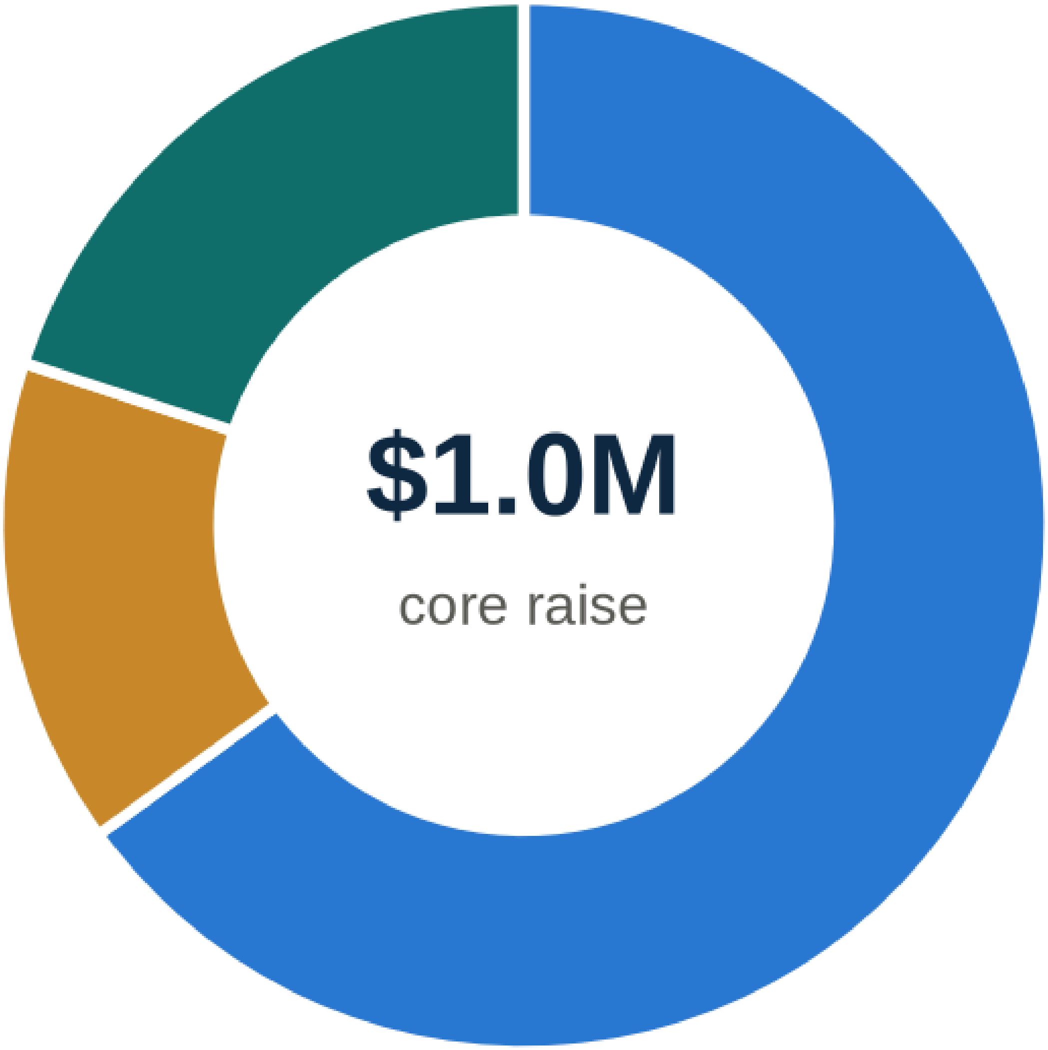


Dividends build to $1.15M/yr; terminal value of $6.6M at 5× Year-5 profit.



Cumulative net profit clears the full $1.0M investment inside Year 2.

Use of funds



Vestwoods container prepayments — $650K (65%)
Setup & showroom fit-out — $150K (15%)
Opex runway & buffer — $200K (20%)

Two milestone-gated tranches of $500K (close / Month 4) plus an optional $500K accelerator. Peak funding need: $0.92M in Jan-27.

THE PLAN

Execution roadmap

M1–M3	M4–M6	M7–M12	M13–M18	Y3–Y5
Launch	**Prove**	**Convert**	**Compound**	**Scale**
T1 drawn; first Vestwoods POs under Sinosure credit; New Cairo showroom opens; Sudan first order.	T2 on milestones; operating & cumulative break-even (M6); dealers signed; first Cairo exhibition.	Algeria first LC orders ship (M8); telecom & C&I pipeline; Libya distributor due diligence.	Credit terms on all POs; Libya launches; full dividend distributions begin.	41 containers/yr across four markets; Alexandria branch; B2G desk; closing cash $5.8M.

THE ASK

$1.0M for half of a business that is already built

An exclusive energy-storage agency priced under every warrantied competitor, four markets in motion, a committed Sudan buyer, and a founder already invested and operational.
