NORCO

EGYPT · GENERAL TRADING

Exclusive Vestwoods (Haier Energy) agency

Al Reem Plastics · group plant in Angola

Egypt · Sudan · Algeria · Libya · Nigeria

Two divisions.
One distribution platform.

Invest in NORCO Egypt: high-value lithium energy storage paired with fast-turning houseware from the group's own Angola plant — targeting **$63.8M revenue** and **$11.8M net profit** over five years, with every dollar of profit distributed and Year-1 profit alone repaying the raise.

INVESTMENT SOUGHT

$1.0M

for 50% of NORCO Egypt · optional $0.5M accelerator

THE OPPORTUNITY

Why the two divisions fit together

Vestwoods brings the ticket size; Al Reem brings the cash velocity and a margin locked in by the group's own plant. One licence, one warehouse, one team.

Complementary cash cycles

Vestwoods containers are prepaid in Year 1 — heavy but high-value. Al Reem's 20,000-unit houseware containers turn in weeks and throw off cash that cushions the battery ramp.

Locked-in houseware margin

Al Reem Plastics is the group's own producer in Angola, supplying NORCO on preferential group terms — ~25% margin on the Egyptian mix and ~17% on export wholesale that no third-party supplier can squeeze.

Priced to win in batteries

Vestwoods retails 15–26% below tier-1 brands per kWh with Haier pedigree, a 5-year warranty and a Cairo service bench the grey market cannot match.

THE DIVISIONS

What NORCO sells

DIVISION 1 · ENERGY STORAGE

Vestwoods — Haier Energy BESS

Exclusive Egypt agency for lithium (LFP) storage, hybrid inverters and telecom power. Egypt sells a 50/50 retail-wholesale mix; Sudan, Algeria and Libya buy on cash-before-shipment terms.

- 340 units / 40ft · Egypt container revenue $433,281 (21% margin)
- Export containers billed at $393,861 · Sinosure-backed supplier credit
- Committed Sudan buyer; Algeria on 100% LC from Month 8

$13.8M
YEAR-5 REVENUE

13 → 41
CONTAINERS Y1 → Y5

DIVISION 2 · HOUSEWARE

Al Reem Plastics — Angola

69 SKUs and 20,488 units per container of storage, kitchen, laundry and tableware, costed line-by-line from the July-2026 packing list. Sold in Egypt (retail + wholesale), Sudan and, from Year 2, Nigeria.

- Landed cost $43,339 per container on group supply terms
- Margin locked: ~25% Egypt blend / 17% export wholesale
- Local-brand prices with imported-brand finish

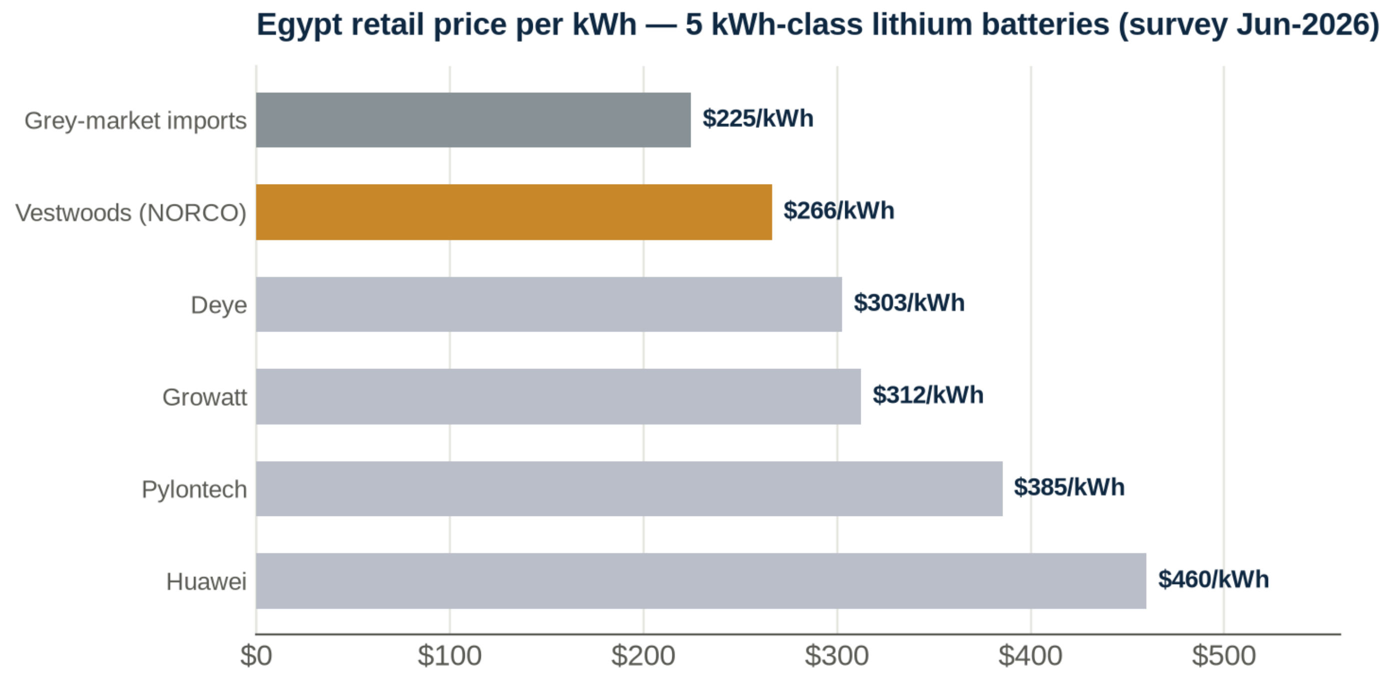
$5.2M
YEAR-5 REVENUE

15 → 95
CONTAINERS Y1 → Y5

MARKET STUDY

Priced to win on both shelves

NORCO's June-2026 Cairo market survey: Vestwoods undercuts every warrantied competitor per kWh, and Al Reem lands at local-brand price points with full margin intact.



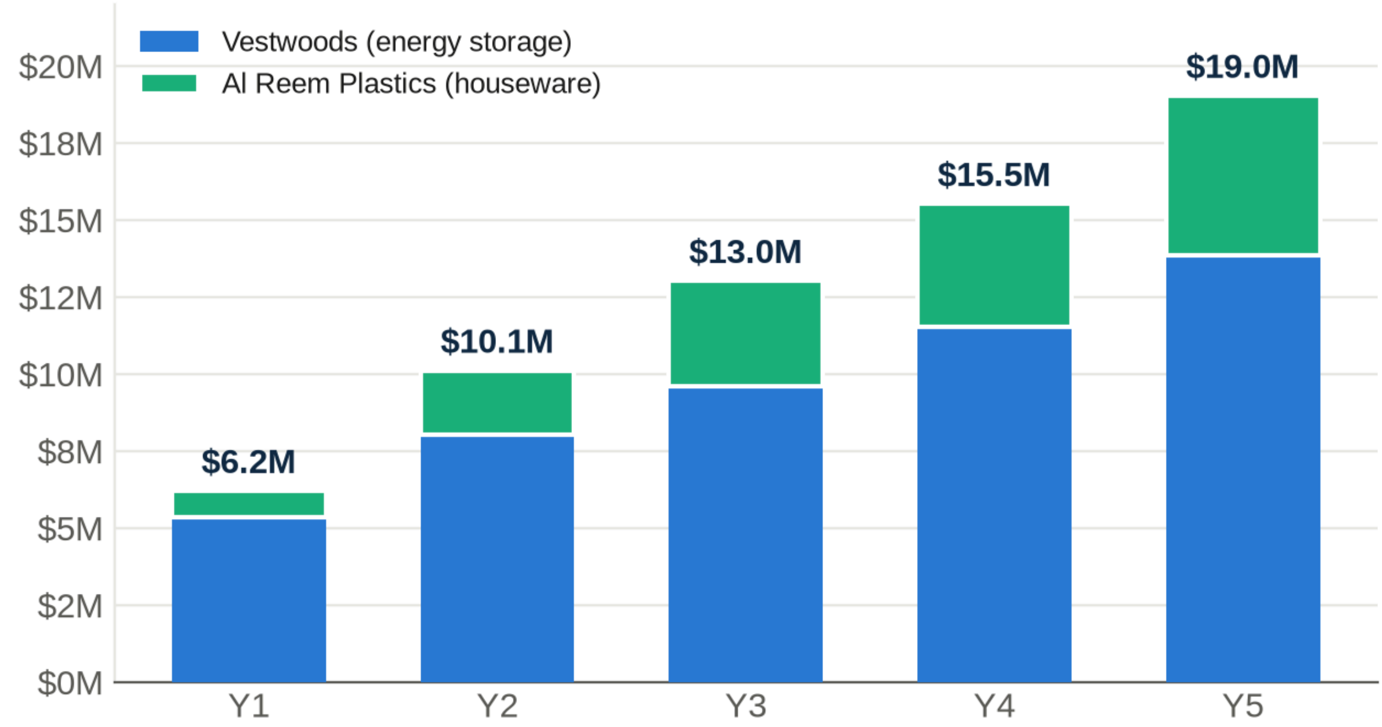
Vestwoods at $266/kWh vs. $303–$460 for warrantied competitors; only the no-warranty grey market is cheaper.
Houseware: Al Reem's 90L waste bin retails EGP 869 vs. EGP 800–1,000 local and EGP 1,100–1,400 imported.

THE NUMBERS

Financial trajectory

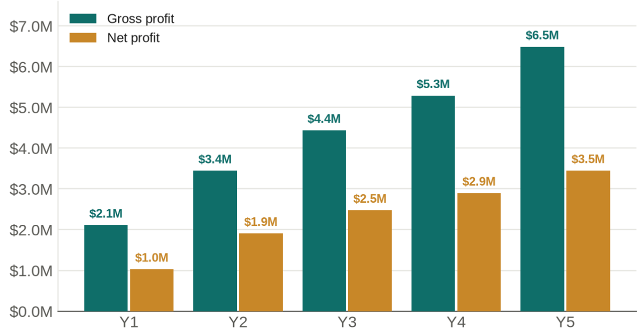
Every figure ties to the companion workbook: Egypt product cost 79% of the retail-wholesale mix, export pricing per the group supply agreements, Al Reem margins contractual. Year 1 is modelled monthly.

Group revenue by division



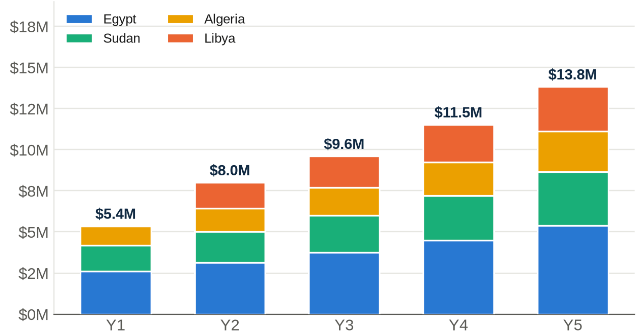
Group revenue scales from $6.2M to $19.0M.

Group gross profit and net profit



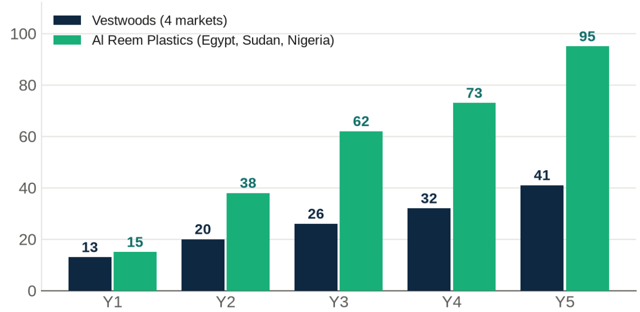
Profitable from Year 1; net profit reaches $3.45M by Year 5.

Vestwoods revenue by market



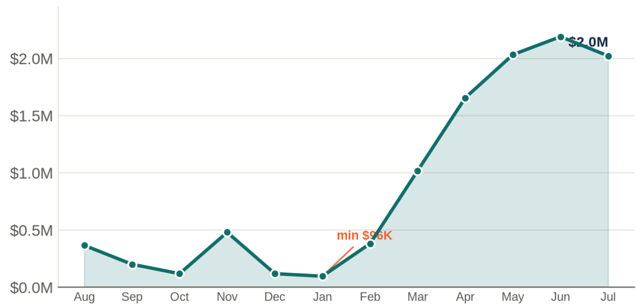
Four Vestwoods markets compounding.

40ft containers shipped per year



Container throughput, both divisions.

Year 1 cash position with the $1.0M raise (monthly)

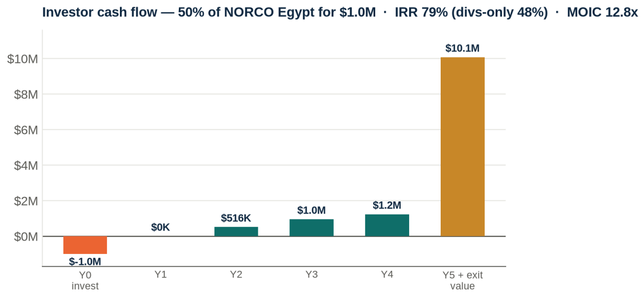


Year-1 cash never goes below $96K with the raise; ends at $2.02M.

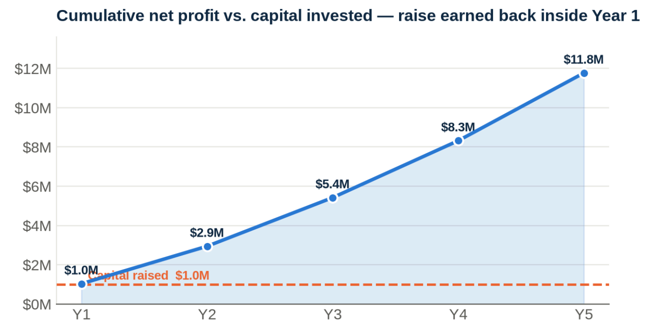
THE RETURN

What the investor earns

$1.0M buys 50% of NORCO Egypt. 100% of net profit is distributed annually in arrears — $4.2M to the investor in dividends alone (4.2x, 48% IRR) — and NORCO UAE (20% shareholder) anchors the agency and the Angola supply line.

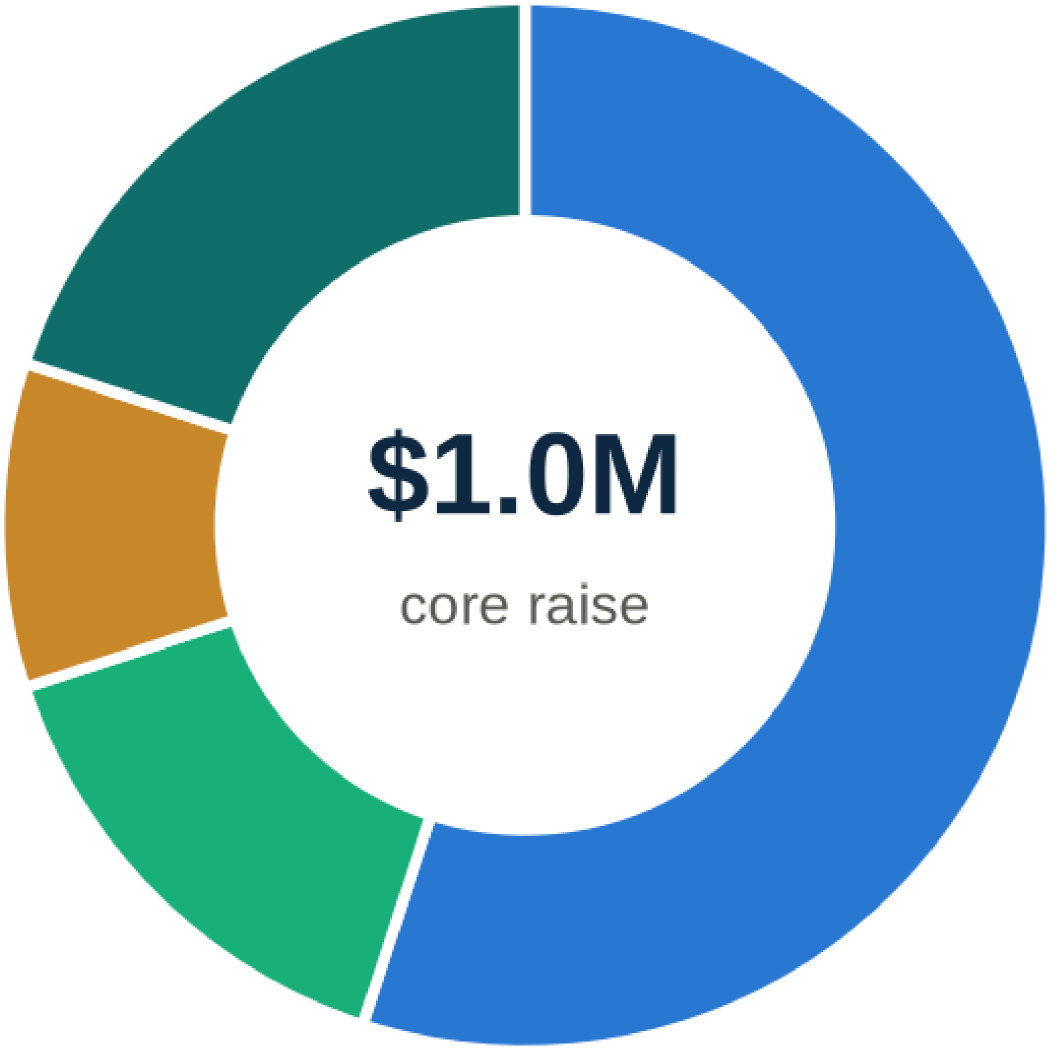


Dividends build to $1.45M/yr; terminal value of $8.6M at 5× Year-5 profit.



Year-1 net profit alone exceeds the full $1.0M investment.

Use of funds



- Vestwoods container prepayments — $550K (55%)
- Al Reem opening inventory — $150K (15%)
- Setup & showroom fit-out — $100K (10%)
- Opex runway & buffer — $200K (20%)

Two milestone-gated tranches of $500K (close / Month 4) plus an optional $500K accelerator. Peak funding need: $0.90M in Jan-27.

THE PLAN

Execution roadmap

M1–M3	M4–M6	M7–M12	M13–M18	Y3–Y5
Launch	**Prove**	**Convert**	**Compound**	**Scale**
T1 drawn; first Vestwoods POs prepaid; New Cairo showroom opens; first Al Reem containers land; Sudan first order.	T2 drawn on milestones; operating & cumulative break-even (M6); dealers signed; houseware sell-through in both showrooms.	Algeria first LC orders ship (M8); hypermarket listings; Libya and Nigeria distributor due diligence.	Vestwoods credit terms activate; Libya launches; full dividend distributions begin.	41 Vestwoods + 95 Al Reem containers/yr; Alexandria branch; closing cash $6.0M.

THE ASK

$1.0M for half of a platform that is already built

An exclusive energy-storage agency priced under every warrantied competitor, a group-owned houseware supply line with locked margins, five markets in motion, and a founder already invested and operational.
